

What's New

- **Added Collaborator Sign-off to Data Download Requests.** Project collaborators added to a data download request must now sign off on the OSIC Data Terms of Use before the request is submitted to OSIC for review.
 - The form provides additional guidance for who qualifies as a project collaborator and that all collaborators must sign off before OSIC review.
 - Collaborators must be authorized OSIC members of the same project. Their names are populated from their OSIC Cloud records.
 - Collaborators receive an OSIC Cloud email notification prompting to review the request and sign off. A popup will appear upon sign in.
 - The request remains in Awaiting Sign-off until all collaborators have signed. It then moves to Pending for OSIC review.
 - Requestors can view each collaborator's status: Pending, Signed, or Declined.
 - If a collaborator declines, the request cannot proceed until the declined collaborator is removed or replaced.
 - Editing request details clears all collected sign-offs. All required sign-offs must then be collected again.
 - Adding or removing collaborators does not invalidate the other collaborators' sign-offs.
 - Requests that remain in Awaiting Sign-off for 14 days expire, and all collected sign-offs are cleared.

Project Collaborators *

Project Collaborators includes any third party — including pharmaceutical or biotech partners — whose asset, trial, or program will be benchmarked, compared against, or otherwise supported by this data, even if that party does not directly access the Platform.

OSIC's review of this data request is contingent upon all Project Collaborators reviewing the request in its entirety and acknowledging and agreeing to the NOTICE OF OSIC DATA TERMS OF USE.

ADD ITEM

▪ **Other Download Request Form Updates.**

- Two options have been added to Primary Purpose: Synthetic Data / Derivative Data Product or Service Generation and Support Clinical Trial or Patient Selection.
- A new required question asks whether the project involves generating synthetic data or synthetic control/comparator arms, creating derivative datasets from OSIC data, or using the data for clinical trial or patient selection, benchmarking, or recruitment on behalf of a non-member third party.

Proposed Project Request

Select Pending Request

Project Name *

Cohort Name *

Estimation Project Completion Date *

Select Pending Request

Select Date

What is the Primary Purpose of the request? (select all that apply) *

☐ Pharmaceutical Research
 ☐ Application / Software Development
 ☐ Other (Describe below)
 ☐ Support Clinical Trial or Patient Selection

☐ Medical Technology Research
 ☐ Educational
 ☐ Synthetic Data / Derivative Data Product or Service Generation

Purpose of the data action request *

Please describe project and planned use of the data

Will this project involve any of the following? (select all that apply) *

☐ Generating synthetic data or synthetic control/comparator arms
 ☐ Creating derivative datasets of the OSIC data
 ☐ Using the data to support clinical trial or patient selection, benchmarking, or recruitment on behalf of a non-member third party
 ☐ None of the above

If any box other than "None of the above" is selected, you will be contacted by OSIC's independent commercial licensing group for further discussion.

Do you plan on publishing your results? *

☐ Yes
 ☐ No

- **Activity Log updates.** The project Activity Log now records data download request events, including:
 - Request creation and sign-off email notifications
 - Collaborator signoffs and declines
 - Request edits and collaborator changes
 - Submission to OSIC for review
 - Request withdrawal and expiry
 - OSIC approval and rejection
- **Maintenance, Stability, & Performance Improvements.** This update includes bug fixes, system maintenance, and performance improvements to improve overall experience.
